

## **Instructions for web application use**

1. To search roads, either type in search parameter in the Search box (top left of map), and hit the Enter key, or may choose the drop-down arrow, select a search service (see Figure 1), then type in a search parameter and hit the Enter key.
2. To view the layers, select the layers icon on the toolbar at the top-right of the map (looks like stacked sheets). When opened, you may toggle layers on/off, and other operations. Select the expansion arrow icon on the left of the check box to see the layer symbols. Select the three dots to the right of the layer name for other options.
3. The icon to the left of the Layers simply displays all layers and symbols (that are currently turned on). This icon looks like some object symbols with lines to the right of the objects.
4. Zoom in/out either with a mouse wheel, or the + or – icons on the top left section of the map.
5. Zoom back to the default extent (entire county) by selecting the icon that looks like a home (on the left side of the map).
6. Zoom to your current location by selecting the icon below the Home icon (looks like a crosshair symbol; on the left side of the map).
7. View all attributes of the data layers by selecting the tab at the bottom, center, of the map, and then selecting the tabs across the top to view the desired layer's data.
